## Type 2

1. cutout on the wall  
cutout size:  
H187\*W153\*D58mm  
(H7.36"\*W6.02"\*D2.28")

2. Adjust the embedded  
part wings, keep the wings  
1-3mm lower than the  
gypsum housing surface.

3. Put the housing in the  
wall properly

4. Fix the housing by  
screws

5. plaster-mesh-putty-  
paint

6. Wire the driver to the  
power, and install the LED  
module on the housing  
[Warning: This step should  
operated when power off!]

7. Done

### Note:

1. The embedded part should be placed 1-3mm lower than the gypsum ceiling/drywall.
2. Clean the hole edges while the paint is still wet, for better fitting of the light module.

- To secure safety, a qualified electrician is required to install/remove the luminaire.
- POWER OFF!!! NOT HOT PLUGGING!!!
